

THE STATE OF UTAH
OFFICE OF STATE ENGINEER
SALT LAKE CITY

ED. H. WATSON
STATE ENGINEER

March 28, 1949

Memorandum for office study only, by F. W. Cottrell

Re: COAL CREEK DISTRIBUTION

In accordance with two letters from the North Field Reservoir & Irrigation Company, one dated February 10, 1949 and the other March 12, 1949, the writer called at Cedar City and contacted Mr. Herbert P. Haight, Secretary. Mr. Haight disclaimed any knowledge of the conditions surrounding the complaint that Cedar City Corporation and the South and West Field Irrigation Company were improperly measuring the water or were discriminating against the North Field Irrigation Company. The writer, therefore, contacted the City Engineer, Mr. John Lowman and requested that he furnish the State Engineer with a rough sketch showing the various canal headings on Coal Creek in the vicinity of Cedar City, all of which the writer understands are not provided with measuring devices. Mr. Lowman proffered his services without cost to the State Engineer to do this work, after which the State Engineer might consider notifying the various companies diverting water from the stream to install proper measuring devices as required by law. Thus no partiality would be shown in the entire area so far as diversions from Coal Creek are concerned.
